AGENDA

● Our Approach to Oracle Update

● Our Analysis of Latest Release

● Innovation

● Closing - Q&A

How to read each Feature Summary?

New Feature Introduced in latest release by Oracle

Evosys Feature Analysis for Your Business

Evosys Impact Study on Potential Impact to users for using new feature
LOW: No large scale impact. Regression testing can be ignored.
HIGH: Needs to be part of the regression testing.

Short Description of the New Feature

ABILITY TO CHANGE CONTACT START DATE

DETAILS:

- If you're an HR Specialist, you can now change a contact's start date on the Family and Emergency Contacts page. As an HR Specialist, you can now complete all your administrative tasks using the responsive pages.
- This feature isn't available for an employee or contingent worker while viewing their contacts' information.

Impact Analysis	
Impact Level	LOW
Need to Enable	NO
Configuration	NO
Quick Win	YES

NO : Already enabled and ready to use with some or no configuration
YES: Need to opt-in to use the feature.

Business Benefits realized from the New Feature

BUSINESS BENEFIT:

Ensure correct data that can be used for any family benefits

YES: Configuration set up needed to use new feature.
NO: User can use the feature by default with no change needed.

YES: Need minimal time of both parties to make use of the feature.
NO : Need significant amount of time and effort to make use of the feature.

QUICK WINS – Default with No Configuration

Career development secured employee search

Details:

Secure administrator access to employees when they search for employees on Career Development pages.

Page	Secured Search Fields
Development Goals	Worker filter
Setup of Development Goals Mass Assignment	Requester filter
Add Mass Assign Goals Process	Requester list of values Add Worker list of values in Included Workers and Excluded Workers sections
Check Person Eligibility	Person Name list of values

Impact Analysis

Impact level **Medium**

Need to enable **No**

Configuration **No**

Quick win **Yes**

Business Benefit:

Enhance security by allowing administrators to see only the employees that they can access.

New ratings source for talent review manager prepare review content ratings

Details:

Distinguish ratings submitted by a manager on the talent review Prepare Review Content page. When viewing ratings in the employee's profile, you will now see a new ratings source called "Talent Review Meeting Preparation" for ratings submitted by the manager prior to the start of the talent review meeting.

Impact Analysis

Impact level **Medium**

Need to enable **No**

Configuration **No**

Quick win **Yes**

Business Benefit:

More clarity can be given to employees in terms of ratings

Exclude contingent workers from review population search

Details:

Leverage the new worker type filter option when you search for employees to add to your review population. You now have the option to include or exclude contingent workers, workers, and non-workers when conducting your review population search.

The screenshot shows the 'Population Selection' interface. At the top, there is a dropdown menu for 'Employees to Include' with the option 'Find by criteria'. Below this is a search bar for 'Employees' with the placeholder text 'Search for people by name, num'. There is also a 'Hidden Filters' link. A 'Saved Search' section includes a 'Filters' dropdown and a 'Save' button. The 'Filters' section is expanded, showing several filter categories: 'Person Name', 'Person Number', 'Manager', 'Workers', 'Assignment Status', and 'Worker Type'. The 'Worker Type' filter is highlighted with a red box and contains three options: 'Contingent worker', 'Employee', and 'Nonworker', each with an unchecked checkbox.

Impact Analysis

Impact Level **Low**

Need to enable **No**

Configuration **No**

Quick win **Yes**

Business Benefit:

New filter is added to enhance the meeting process

Select owners to notify for succession alerts

Details:

Leverage the ability to select the succession plan owners who need to receive succession-related notifications. In each plan, you can now indicate which owners should receive notifications for the plan changes.

Fewer clicks to launch elearning from course enrollment details

Details:

Launch eLearning with a single click on the course enrollment details page when you receive a course assignment and haven't yet selected an offering to complete the training.

Impact Analysis

Impact Level	High
Need to Enable	No
Configuration	No
Quick Win	Yes

Business Benefit:

Enhanced design simplifies the learner's experience because there are now fewer clicks to get to eLearning.

Scorm limited attempts

Details:

Configure SCORM and HACP content to allow a specific number of attempts before completing the learner's enrollment as Not Passed. This is a new option for the Recorded Attempts field, which previously allowed for Single or Unlimited attempts.

The screenshot shows the configuration page for SCORM content (ID: SCORMMK 03312021). The 'Advanced' section is expanded, showing the following settings:

- Content Type: SCORM 1.2
- *Auto Commit: Default
- Recorded Attempts:** Limited Number (highlighted with a red box)
- *Number of Recorded Tries: 2 (highlighted with a red box)
- Recorded Attempt Review: Do not enable learners to review

Metadata fields include:

- Created By: Meg Fitzimmons

Purge learning records using hdl

Details:

Use the HDL Learning Record business object to permanently remove learning records so that they no longer appear to administrators or in reporting. This allows you to remove any unwanted learning record data.

Here is a sample .dat file for purging a learning record:

```
METADATA | LearningRecord | LearningRecordId | LearningRecordEffectiveStartDate | LearningRecordEffectiveEndDate | LearningRecordNumber | AssignmentNumber | LearningItemType | LearningItemNumber | LearnerNumber | LearningRecordStatus | LearningRecordPurgeFlag
```

```
DELETE | LearningRecord | | 2021/03/11 | | OLC207847 | OLC207848 | ORA_COURSE | OLC397407 | 8153756 | ORA_ASSN_REC_DELETED | Y
```

Impact Analysis

Impact Level **High**

Need to Enable **No**

Configuration **No**

Quick Win **Yes**

Business Benefit:

Allows you to remove any unwanted learning record data.

HDL learning record business object enhancements

Details:

Use the new HDL Learning Record business object enhancements, which enable you to:

Update an offering learning record status from Withdrawn to Deleted.

Update a learning record status from Active to Deleted for any learning item type.

These new capabilities let you easily update learning records directly to Deleted status, so that they disappear from self-service view.

Impact Analysis

Impact Level **High**

Need to Enable **No**

Configuration **No**

Quick Win **Yes**

Business Benefit:

Business Enhancement

Import eLearning completion details with renewals using hdl

Details:

Use HDL to load eLearning completion details for renewing course assignments. This enables learners to review the eLearning content of their past completion for a course.

Completion details of a course assignment refer to the offering and its activities that the learner completed in order to obtain the course completion. Loading completion details using HDL is accomplished by loading an offering assignment in an active status, and then the activity attempt completion to update the assignment to completed.

Impact Analysis

Impact Level **High**

Need to Enable **No**

Configuration **No**

Quick Win **Yes**

Business Benefit:

Business Enhancement

Virtual classroom provider background process changes

Details:

Be aware that multiple external provider synchronization jobs for WebEx and Adobe, which had the same names, have been consolidated into a single job to simplify configuration tasks. The new job is called Virtual Classroom External Provider Synchronization.

Succession alerts on role change effective date

Details:

Receive succession alerts regarding candidate or incumbent role changes in Global HR Employment on the day the role changes take effect. Prior to this release, the alerts were sent as soon as the role change was entered in the employee's employment record.

SUCCESSION REPLACED OR REMOVED FEATURES

From time to time, Oracle replaces existing features with new features, or removes existing features.

Replaced features may be put on a path of removal, the features below will let you know what update you will have to have moved to the newer feature. As a best practice, you should move to the newer feature as soon as possible for full support and to stay up with the latest updates that the product offers.

Any feature that is removed, will have an Update in which that feature is no longer available. Please make necessary plans to move off the feature by the Update indicated, as it will no longer be available.

Notifications for check-ins

Details:

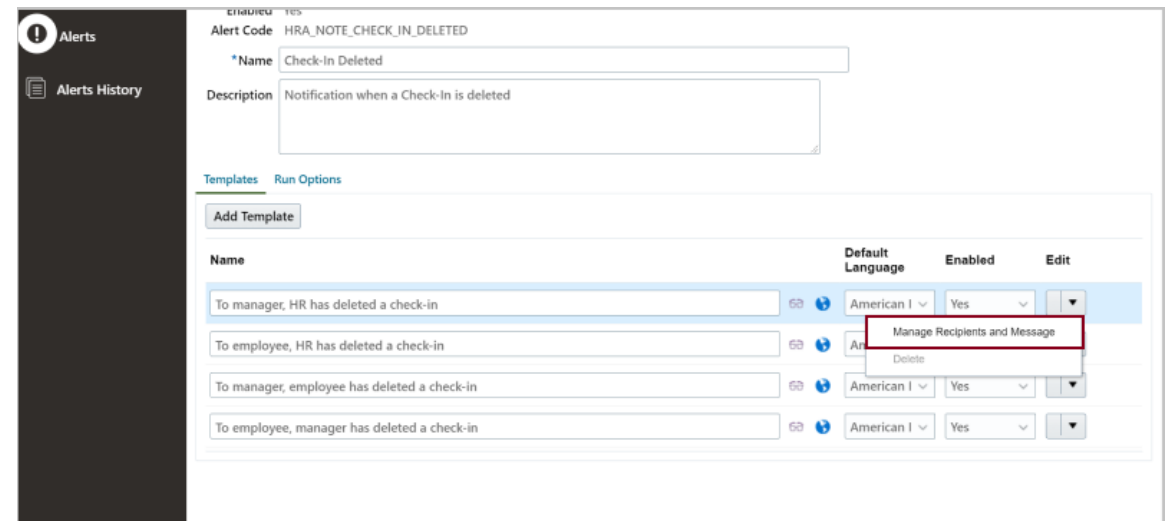

Reduce the time you spend checking the system for updates to check-ins by enabling new notifications. Here's when you can send notifications:

- When you create check-in discussion topics or notes.
- When you delete check-ins, discussion topics or notes.
- You can view the note text directly in the notification.

Impact Analysis

Impact level	Medium
Need to enable	Yes
Configuration	Yes
Quick win	No

Support for skillsoft and linkedin course thumbnail images

Details:

Notice that the learner's visual experience with courses imported from LinkedIn or Skillsoft has been enhanced. The content providers' thumbnail images for each course are now added as the branding image on the courses created in Oracle Learning Cloud.

The image shows two overlapping screenshots from the Oracle Learning Cloud interface. The top window is titled "Schedule New Process" and contains the following elements:

- Type: Job Job Set
- Name: Load and Synchronize External Course Data
- Description: The job is responsible for loading the available courses from external content providers into Oracle Learning Cloud so that they are available for import. In addition to loading the metadata to allow for search, it will load the sync status from its provider. This is a job that needs to be scheduled and should run daily.
- Buttons: OK, Cancel

The bottom window is titled "Process Details" and contains the following elements:

- Information: This process will be queued up for submission at position 1
- Buttons: Process Options, Advanced, Submit, Cancel
- Name: Load and Synchronize External Course Data
- Description: The job is responsible for loading the availabl... Notify me when this process ends
- Schedule: As soon as possible
- Submission Notes: [Empty text box]
- Section: Basic Options
- Parameters:
 - Force All External Course Data to Reload: No (dropdown menu is open, showing "No" and "Yes" options, with "Yes" highlighted)

GLIDE - DATA MIGRATION AUTOMATION

Problem Statement: Large data migrations required lot of validations hence increase manual efforts.

Solution: To make Data Validation and Migration Process in an easy way.

- Evosys have developed custom cloud application which validates data as per Oracle structure before pushing Data into Oracle Cloud.
- It Has different stages to validate and migrate data.
- Automatic data split in multiple batches in case of bulk data management which in FBL or HDL, users needs to do manually.
- Can segregate errored records with user friendly message.
- Easy to deploy and connect with Oracle cloud.
- Highly secured with encrypted password and role-based access.
- No explicit hardware required.

HOW IT WORKS

Select Objects

- Upload file transform , validate

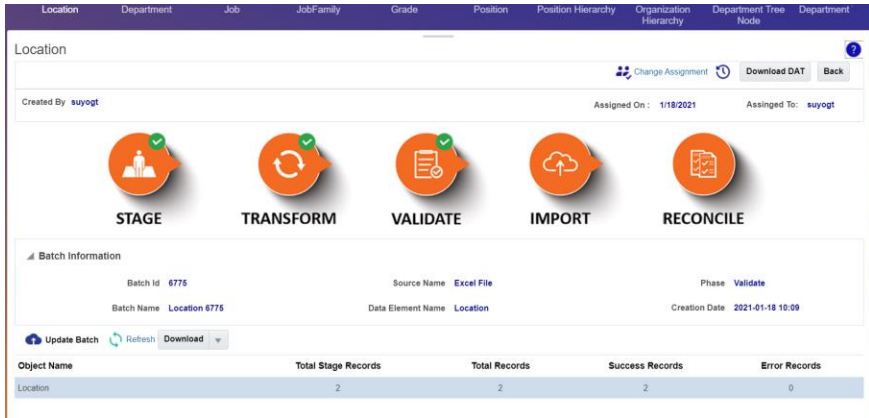

Submit File

- Import File

Wait for the result

- System will import file in fusion
- You can work on other objects

BENEFITS AND CURRENT STATUS

➤ Automation

Integrated Process for Data Validations, Transformations, Upload and Reconciliation.

➤ Time Saving

Reduction in time for manually data verification

Incremental/Multiple Iterations for transformation with ease

Before loading you will be able to understand the possible upload problems/issues

➤ Optimization

Opportunity to transform the data at Middle Layer rather than Source

➤ Assets

Remove Manual intervention for Data Verification and Quality Check
