**Data Privacy Impact Assessment (DPIA):** tools and assessments used to identify and reduce risks of a data processing activity. A DPIA can be carried out as part of Privacy by Design and should be conducted for all major system or business change programmes involving the Processing of Personal Data.

**Data Protection Officer (DPO):** the person/s appointed by MASTEK Company data privacy team assist us to monitor internal Data Privacy compliance, inform and advise on our data protection obligations, provide advice regarding Data Protection Impact Assessments (DPIAs) and act as a contact point for data subjects and regulators.

**Explicit Consent:** consent which requires to be clear and specific written consent.

**Applicable Privacy Law(s):** means all data protection and privacy laws and regulations applicable to the processing of Personal Data in question, including but not limited to, EU/UK Data Protection Law, California Privacy Rights Act, The Australian Federal Privacy Act 1988, Singapore Data Protection Act, Digital Personal Data Protection Act, 2023 and as introduced, amended and superseded from time to time.

**Legitimate Interests/Purposes:** means a situation in which Mastek shall balance our reason and the necessity of processing the personal data against the interests, rights and freedoms of the Data Subject, taking into account the particular circumstances as it is not centred around a particular purpose (e.g. performing a contract with the Data Subject, complying with a legal obligation, protecting vital interests or carrying out a public task), and it is not processing that the Data Subject has specifically agreed to (consent).

**Personal Data:** any information identifying a Data Subject or information relating to a Data Subject that we can identify (directly or indirectly) from that data alone or in combination with other identifiers we possess or can reasonably access. **19. Privacy by Design and Data Protection Impact Assessment (DPIA)**

19.1 We are required to implement Privacy by Design measures when Processing Personal Data by implementing appropriate technical and organisational measures (like Pseudonymisation) in an effective manner, to ensure compliance with data privacy principles.

19.2 You must assess what Privacy by Design measures can be implemented on all programmes, systems or processes that Process Personal Data by taking into account the following:

- (a) The state of the art.
- (b) The cost of implementation.
- (c) The nature, scope, context and purposes of Processing.

19.3 The Controller must also conduct a DPIA in respect to high-risk Processing.

- (a) Use of new technologies (programs, systems or processes, including the use of AI), or changing technologies (programs, systems or processes).
- (b) Automated Processing including profiling and ADM.
- (c) Large-scale Processing of Special Categories of Personal Data or Criminal Convictions Data.
- (d) Large-scale, systematic monitoring of a publicly accessible area.

19.5 A DPIA must include:

- (a) A description of the Processing, its purposes and the Controller's legitimate interests if appropriate.

Division: Privacy and Compliance	Doc. Name: Privacy Policy	Version :09.01
Document Classification: Confidential	Date: 29.05.2024	Page: 18 of 24

- (b) An assessment of the necessity and proportionality of the Processing in relation to its purpose.
- (c) An assessment of the risk to individuals.
- (d) The risk mitigation measures in place and demonstration of compliance.

**20. Automated Processing (including profiling) and Automated Decision-Making**

20.1 Generally, ADM is prohibited when a decision has a legal or similar significant effect on an individual unless:

- (a) a Data Subject has Explicitly Consented;
- (b) the Processing is authorised by law; or
- (c) the Processing is necessary for the performance of or entering into a contract.

20.2 If certain types of Special Categories of Personal Data or Criminal Convictions Data are being processed, then grounds (b) or (c) will not be allowed. However, the Special Categories of Personal Data and Criminal Convictions Data can be Processed where it is necessary (unless less intrusive means can be used) for substantial public interest like fraud prevention.

20.3 If a decision is to be based solely on Automated Processing (including profiling), then the Data Subject must be informed when you first communicate with them of their right to object. This right must be explicitly brought to their attention and presented clearly and separately from other information. Further, suitable measures must be put in place to safeguard the Data Subject's rights and freedoms and legitimate interests.

20.4 We must also inform the Data Subject of the logic involved in the decision making or profiling, the significance and the envisaged consequences, and give the Data Subject the right to request human intervention, express their point of view or challenge the decision.

20.5 A DPIA must be carried out before any Automated Processing (including profiling) or ADM activities are undertaken.

20.6 Where you are involved in any data Processing activity that involves profiling or ADM, you must first work with Data Privacy team and ensure that a DPIA has been conducted.

**21. Direct marketing**

- 21.1 We are subject to certain rules and privacy laws when engaging in direct marketing to our customers and prospective customers (for example when sending marketing emails or making telephone sales calls).
- 21.2 For example, in a business to consumer context, a Data Subject's prior consent is generally required for electronic direct marketing (for example, by email, text or automated calls). The limited exception for existing customers known as "soft opt-in" allows an organisation to send marketing texts or emails without consent if it:
  - (a) Has obtained contact details in the course of a sale to that person.
  - (b) Is marketing similar products or services.
  - (c) Gave the person an opportunity to opt out of marketing when first collecting the details and in every subsequent marketing message.
- 21.3 The right to object to direct marketing must be explicitly offered to the Data Subject in an intelligible manner so that it is clearly distinguishable from other information.

Suppression involves retaining just enough information to ensure that marketing preferences are respected in the future.
- 21.5 You must comply with the Company's guidelines on direct marketing to customers and you should consult with your line manager or the legal team or the DPO, if you have any data protection queries relating to direct marketing to comply with either the Company's guidelines or the law.
